6 ABC is a right-angled triangle.

$AC = 14$ cm.
Angle $C = 90°$

size of angle B : size of angle $A = 3 : 2$

Work out the length of AB.
Give your answer correct to 3 significant figures.

Angles A + B = 180° − 90° = 90°

	Angle B	Angle A	Total	
×18	3	2	5	
	54	36	90	×18

1 mark
Share 90° in the ratio 3 : 2.

At A: AC is adjacent; AB is the hypotenuse.

$$\cos 36° = \frac{14}{AB}$$

1 mark
Correct cosine equation.

$$AB = \frac{14}{\cos 36°} = 17.30495168...$$

1 mark
Rearrange the equation.

AB = 17.3 cm

1 mark
Correct length.

..... cm

(Total for Question 6 is 4 marks)
