15 120 people were at a hockey match.

Each person was asked if they wanted to stand or to sit to watch the match.

75 of the people were female
29 of the males wanted to stand
30 of the people wanted to sit

(a) Use this information to complete the frequency tree.

Male: 120 – 75 = 45; male sit: 45 – 29 = 16

Female sit: 30 – 16 = 14; female stand: 75 – 14 = 61

3 marks total
Use 120 and 75
Use 29 and 30
Complete all branches

(3)

One of the 120 people is chosen at random.

(b) Write down the probability that this person is a male who wanted to stand.

P(male and stand) = 29/120

1 mark
29 out of 120
