5 The diagram shows triangle *ABC*.

ADB is a straight line.

the size of angle *DCB* : the size of angle *ACD* = 2 : 1

Work out the size of angle *BDC*.

Angle ACB = 180° – 75° – 51° = 54°

Three ratio parts, so 54° ÷ 3 = 18°.

Angle DCB = 2 × 18° = 36°.

In BCD, angle BDC = 180° – 51° – 36° = 93°.

4 marks total
Find 54° at C
Ratio part 18°
Use angle sum in BCD
Angle BDC = 93°

°

(Total for Question 5 is 4 marks)
