9 A car travels for 18 minutes at an average speed of 72 km/h.

(a) How far will the car travel in these 18 minutes?

18 min = 18/60 h = 0.3 h.

Distance = 72 × 0.3 = 21.6 km.

2 marks total
Use speed × time
21.6 km

..... km

(2)

David says,

"72 kilometres per hour is faster than 20 metres per second."

(b) Is David correct?
You must show how you get your answer.

72 km/h = 72 000 m / 3600 s = 20 m/s.

The speeds are equal, so David is not correct.

2 marks total
Convert comparable units
No: equal speeds
