19 The diagram shows a hemisphere with diameter 8.4 cm.

Volume of sphere $= \frac{4}{3}\pi r^3$

Work out the volume of the hemisphere.
Give your answer correct to 3 significant figures.

Radius = 8.4 ÷ 2 = 4.2 cm.

Hemisphere volume = ½ × (4/3)πr³

= (2/3)π(4.2)³ ≈ 155.17 cm³.

To 3 significant figures: 155 cm³.

2 marks total
Use hemisphere formula
155 cm³ to 3 s.f.

..... cm³

(Total for Question 19 is 2 marks)
