11 The probability tree diagram shows the probabilities that Bismah will be late for work on two days next week.

Calculate the probability that Bismah will be late on exactly one of the two days.

3 marks total
Multiply one path
Add both paths
0.1709

Exactly one late day has two paths:

late Monday, not late Tuesday: 0.07×0.98=0.0686;

not late Monday, late Tuesday: 0.93×0.11=0.1023.

Add: 0.0686 + 0.1023 = 0.1709.

(Total for Question 11 is 3 marks)
