8 The diagram shows a regular pentagon and a parallelogram.

Work out the size of the angle marked x.
You must show all your working.

Parallelogram angle at the bottom left

$= 180° - 117° = 63°.$

Regular pentagon interior angle

$= (5 - 2) \times 180° \div 5 = 108°.$

So $x = 108° - 63° = 45°.$

4 marks total
63° at parallelogram
Pentagon interior 108°
Subtract
x = 45°

.....°

(Total for Question 8 is 4 marks)
