10 Given that $\frac{a}{b} = \frac{2}{5}$ and $\frac{b}{c} = \frac{3}{4}$

find $a : b : c$

$a : b = 2 : 5$, while $b : c = 3 : 4$.

Make $b = 15$: $a : b = 6 : 15$ and $b : c = 15 : 20$.

Therefore $a : b : c = 6 : 15 : 20$.

3 marks total
Identify the two ratios
Common b = 15
6 : 15 : 20

(Total for Question 10 is 3 marks)
