23 There are four types of cards in a game.

Each card has a black circle or a white circle or a black triangle or a white triangle.

number of cards with a black shape	:	number of cards with a white shape	=	3 : 5
number of cards with a circle	:	number of cards with a triangle	=	2 : 7

Express the total number of cards with a black shape as a fraction of the total number of cards with a triangle.

Black fraction of all cards = 3/(3 + 5) = 3/8.

Triangle fraction of all cards = 7/(2 + 7) = 7/9.

Required fraction = (3/8) ÷ (7/9)

= (3/8) × (9/7) = 27/56.

3 marks total
Fractions 3/8 and 7/9
Divide fractions
27/56

(Total for Question 23 is 3 marks)
