29 The diagram shows a solid triangular prism.

The prism is made from wood with a density of 0.8 g/cm³

Work out the mass of this prism.

Triangular end area = 1/2 × 6 × 4 = 12 cm².

Prism volume = 12 × 10 = 120 cm³.

Mass = density × volume = 0.8 × 120 = 96 g.

3 marks total
Triangle area 12
Volume 120 cm³
Mass 96 g

..... g

(Total for Question 29 is 3 marks)
