14 Here is a shape with all its measurements in centimetres.

The area of the shape is A cm^2

Show that $A = 2x^2 + 24x + 46$

Outer rectangle: $(2x + 6)(x + 11)$

Missing top-right rectangle: $4(x + 5)$

$A = (2x + 6)(x + 11) - 4(x + 5)$

$= 2x^2 + 28x + 66 - 4x - 20$

$= 2x^2 + 24x + 46$, as required.

1 mark
one correct rectangle area

1 mark
complete subtraction

1 mark
expand to stated result

(Total for Question 14 is 3 marks)
