16 The pie chart gives information about the colour of each car in a car park.

There are 135 black cars in the car park.

(a) Work out the number of white cars in the car park.

Black: 90° corresponds to 135 cars.

White: 80° corresponds to 135 × 80/90 = 120.

3 marks total
Use sector proportion
80/90 × 135
120 cars

.....

(3)

There are 50 grey cars in the car park.

A car in the car park is picked at random.

(b) Find the probability that this car is grey.

Total cars = 135 × 360/90 = 540.

P(grey) = 50/540 = 5/54.

2 marks total
Find total 540
50/540

.....

(2)

(Total for Question 16 is 5 marks)
