28 In a sale, the normal price of a boat is reduced by 15%
The sale price of the boat is £272 000

Work out the normal price of the boat.

Sale price is 100% – 15% = 85% of normal.

Normal price = £272 000 ÷ 0.85 = £320 000.

2 marks total
Divide by 0.85
£320 000

£.....

(Total for Question 28 is 2 marks)
