6 *ABC* is a right-angled triangle.

(a) Work out the length of *BC*.
Give your answer correct to 1 decimal place.

tan 56° = BC / 12

BC = 12 tan 56° = 17.7907...

BC = 17.8 cm (1 d.p.)

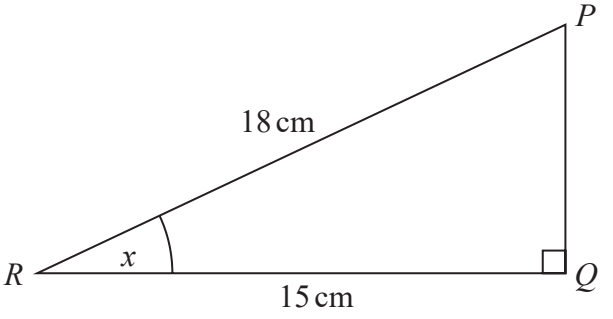

1 mark
tan 56 = BC/12

1 mark
17.8 cm

17.8 cm

(2)

PQR is a right-angled triangle.

(b) Work out the size of the angle marked *x*.
Give your answer correct to 1 decimal place.

cos x = 15/18

x = arccos(15/18) = 33.557...°

x = 33.6° (1 d.p.)

1 mark
cos x = 15/18

1 mark
33.6°

33.6 °

(2)

(Total for Question 6 is 4 marks)
