10 Corina has £300 to spend on books.
Each book costs £4.85

Work out the greatest number of books Corina can buy.

300 ÷ 4.85 = 61.855...

61 books cost £295.85; 62 would cost £300.70.

Greatest whole number: 61 books.

3 marks total
Divide budget by price
