1 The scatter graph shows information about the volume of traffic and the carbon monoxide level at a point on a road each day for 22 days.

One point is an outlier.

(a) Write down the coordinates of this point.

1 mark
outlier (100,18)

(100, 18, ...)

(1)

For another day, 370 cars pass the point on the road.

(b) Estimate the carbon monoxide level for this day.

At 370 cars, line of best fit gives about 14 mg/m³.

1 mark
read from trend at 370

1 mark
13.8 to 14.8 mg/m³

..... 14 ..... mg/m³

(2)

Alfie says,

"Because there is an outlier, there is no correlation."

(c) Is Alfie correct?
You must give a reason for your answer.

No: the remaining points still show positive correlation.

1 mark
outlier does not remove trend

(1)

(Total for Question 1 is 4 marks)
