21		20	P1	for process to find the height of the surface of water, eg $32 \times \frac{3}{4} (= 24)$ or to find the volume of the tank, eg $50 \times 32 \times 20$ (= 32 000)
			P1	for process to find volume of water and sand, eg $50 \times$ "24" $\times 20$ (= 24 000) or "32 000" $\times \frac{3}{4}$ (= 24 000) or for process to divide their height in the ratio 5 : 1 eg "24" $\div (5 + 1) \times 5$ $(= 4 \times 5 = 20)$
			P1	(dep P1) for process to divide volume in ratio 5:1, eg "24 000" $\div (5 + 1) \times 5$ $(= 4000 \times 5 = 20\,000)$ or process to find volume of water, eg "20" $\times 50 \times 20$ (= 20 000)
			P1	for process to convert to litres, eg "20 000" $\div$ 1000
