12			56	P1	for correct substitution into the formula for the volume of a cylinder, e.g. $\pi \times 5^2 \times h$ (= 1178)
				P1	for correct rearrangement to find the height e.g. $h = 1178 \div (\pi \times 5^2)$ (= 14.99876184)
				P1	(dep on P1) for correct use of tangent ratio, e.g. tan x = "14.99…" ÷ 10
				A1	for answer in the range 56 to 56.31
