13	(a)	3.4	B1	cao	
	(b)	28	M1	for a complete method to find the number of pints eg read off at 4 and ×4	Readings should be accurate eg 16 × 1.8 not 16 × 1.4 but allow for some tolerance eg 16 × 1.7
			A1	26 to 30	
	(c)(i)	$\frac{4}{7}$	M1	for a complete method to find the gradient	Drawing a right-angled triangle is insufficient unless a correct method is shown eg 4 ÷ 7
			A1	0.55 to 0.6	Allow answers in the range 0.55 to 0.6, including fractions that equate to within the range
	(ii)	Statement	C1	eg number of litres per pint	Do not accept a description of the relationship eg "there are more pints as there are more litres"
