21	14.5 to 14.53	M1	for substituting into Pythagoras' theorem eg $16^2 = 6.7^2 + a^2$ **or** $\sqrt{16^2 - 6.7^2}$	
		M1	for a complete method to find the unknown length eg $\sqrt{256 - 44.89}$	Method must show they understand to square; $\sqrt{16\times16 - 6.7\times6.7}$ is sufficient
		A1	Answers in the range 14.5 to 14.53	If an answer is given in the range but then incorrectly rounded award full marks.
