16	(a)	Graph	M1	Sketches $y = x^2$	An approximate sketch of the graph is all that is needed; no other information required.
			M1	for a partially correct reflection of $y = x^2$ in the line $y = x$	The line $y = x$ does not need to be shown. If only part of $y=x^2$ has been drawn and therefore only part of the reflection shown, then award M0 M1.
			A1	for $y = x^2$ and $y^2 = x$ sketched.	Curves must pass through the origin. The label C is not needed if the intention is clear.
	(b)	A,D,G,E	B3	for all 4 correct	
			(B2	for 3 correct)	
			(B1	for 2 correct)
