9	20	P1	for showing a process to find the interior angle of the pentagon eg $(5 - 2) \div 5 \times 180$ (=108)	Award if 108 is shown as an interior angle on the diagram (eg at *SPT*) but **not** contradicted by other working or placed incorrectly
		P1	for finding the interior angle of the unknown polygon eg $360 - 90 -$ "108" (=162)	Award if 162 is shown as an interior angle on the diagram (eg at *RPT*) but **not** contradicted by other working or placed incorrectly
		P1	for a complete method to find *n* eg $360 \div (180 -$ "162") (=20)	
		A1	cao	Do not award this mark unless working is shown leading to the correct answer.
