16	60, 32, 28, 24, 8, 14, 14	M1	starts to interpret information eg 60 and 32 in correct place	
		M1	for $32 \div 4 \times 3$ oe (= 24)	
		M1	for $60 - 32$ (= 28) **AND** "28" $\div 2$ (= 14)	
		A1	completes frequency tree correctly	All frequencies correct but written as probabilities award M3 A0
