2	(a)	6, 9	B1	cao	
	(b)	Yes (supported)	C1	Yes with supporting evidence eg its the 11th term **or** $11^2 + 5 = 126$	
	(c)	$-7n + 33$	M1	for $-7n$ **or** $-7n + k$ (where $k \neq 33$)	
			A1	for $-7n + 33$ oe	Accept eg $T = -7n + 33$ but $n = -7n + 33$ gets M1 A0

Documented scheme clarification

1MA1_MOCK_SET_04_3H_Q2

Original source

scheme page 6, SHA256 eba1d944d6aea04bd4598b102d1cf2d03562f9004978fda18f1b9d5f694a9022

Original wording

The scheme labels the three answer rows(a),(b),(c).

Correction / interpretation

The source answer rows labelled (a), (b), (c) correspond respectively to the printed question parts (a)(i), (a)(ii), (b): 6 and 9; Yes, the 11th term; 33-7n. The answers and 1,1,2 mark allocations are unchanged.

Reason

Match the actual printed nested parts, not the erroneous scheme row labels.

SoI authority
