14 Gavin, Harry and Isabel each earn the same monthly salary.

Each month,

Gavin **saves** 28% of his salary and spends the rest of his salary

Harry spends $\frac{3}{4}$ of his salary and **saves** the rest of his salary

the amount of salary Isabel saves : the amount of salary she spends = 3 : 7

Work out who saves the most of their salary each month.
You must show how you get your answer.

(Total for Question 14 is 4 marks)

15 Work out 15% of 160 grams.

P	g
100	160
÷10 ↓	↓ ÷10
10	16
÷2 ↓	↓ ÷2
5	8

P means percent.

15% = 10% + 5%

16 g + 8 g = 24 g

1 mark
Find 10% and 5%, then add them

1 mark
Correct mass

24 grams

(Total for Question 15 is 2 marks)
