

| Question | Working | Answer | Mark | Notes                                                                                                                                                |
|----------|---------|--------|------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11       | (a)     | 36     | M1   | demonstrates the start of a method that could lead to the answer, eg recognition of square numbers, <b>or</b> use of differences, <b>or</b> diagrams |
|          |         |        | A1   |                                                                                                                                                      |
|          |         | 80     | M1   | demonstrates the start of a method that could lead to the answer, eg repeated addition of 4, <b>or</b> $20 \times 4$                                 |
|          |         |        | A1   |                                                                                                                                                      |
|          |         |        | C2   | conclusion with supportive evidence, eg $\text{odd} \times \text{odd} = \text{odd}$ , <b>or</b> all odd numbers squared will be odd.                 |
|          |         |        | (C1) |                                                                                                                                                      |
