

19		$x < -2, x > \frac{1}{2}$	M1	for a first step to solve the quadratic e.g. factorisation: $(2x + 4)(x - \frac{1}{2})$ or
				$(2x - 1)(x + 2)$ or using the formula $\frac{-3 \pm \sqrt{3^2 - 4 \times 2 \times (-2)}}{2 \times 2}$
			A1	for -2 and $\frac{1}{2}$
