

13	$3n^2 + 7$	M1	begins to work with second differences	$\begin{array}{ccccc} 9 & 15 & 21 & 27 & 33 \\ & 6 & 6 & 6 & 6 \end{array}$ A quadratic expression of the form $3n^2 + bn + c$ can be awarded the first 2 marks
		M1	identifies $3n^2$ as part of the expression, eg gives the sequence 3, 12, 27, 48, ... or gives a quadratic expression which includes the term $3n^2$	
		A1	for $3n^2 + 7$ oe
