

19 200 people were asked if they like any of running, cycling or swimming.

Of these people,

8 like running, swimming and cycling

16 like running and swimming but not cycling

33 do not like any of these activities

28 like cycling and swimming

all 40 people who like cycling like at least one other activity

124 like running

One of the people asked is chosen at random.

Given that this person likes swimming, find the probability that this person likes cycling.
