

12	(a)	No from correct figures	P1 for first step in process to solve the problem, eg find cost of 3 T-shirts, $25 \times 3 (= 75)$ or eg find remaining money after just one purchase, eg $200 - 60 (= 140)$ or $200 - 25 (= 175)$ P1 for process to find total cost of trainers and T-shirts, eg $60 + "75" (= 135)$ or find total cost including cost of jacket, eg. $60 + "75" + 80 (= 215)$ or find the change after buying all 4 items, eg. $200 - 60 - 3 \times 25 (= 65)$ oe C1 for No from correct figures Acceptable examples No, needs 215 No, only has 65 left No, needs 15 more Not acceptable examples Yes	Award this mark for addition of 2 or more items or for subtraction of one item or more from 200 eg $200 - 50 (= 150)$ etc. Figures can be given without units (\$)
	(b)	Explanation	P1 for a start to a method, eg. approximating 0.749 to 0.7, 0.74, 0.75 or 0.8 C1 for explanation Acceptable examples $0.7 \times 60 = 42$ [is an underestimate] $0.74 \times 60 = 44.4(0)$ [is an underestimate] . Not acceptable examples $0.75 \times 60 = 45$ [is an overestimate] $0.8 \times 60 = 48$ [is an overestimate]	For full marks, any calculations must be correct. No statement in words is needed.
