13 Ted is trying to change $0.\dot{4}\dot{3}$ to a fraction.

Here is the start of his method.

$$x = 0.\dot{4}\dot{3}$$

$$10x = 4.\dot{3}\dot{4}$$

$$10x - x = 4.\dot{3}\dot{4} - 0.\dot{4}\dot{3}$$

Evaluate Ted's method so far.

10x and x have different repeating tails;

subtracting does not cancel them. Use 100x – x.

1 mark
recurring tails must align

(Total for Question 13 is 1 mark)
