**17** On the grid show, by shading, the region that satisfies all of these inequalities.

$$2y + 4 < x \qquad x < 3 \qquad y < 6 - 3x$$

Label the region **R**.

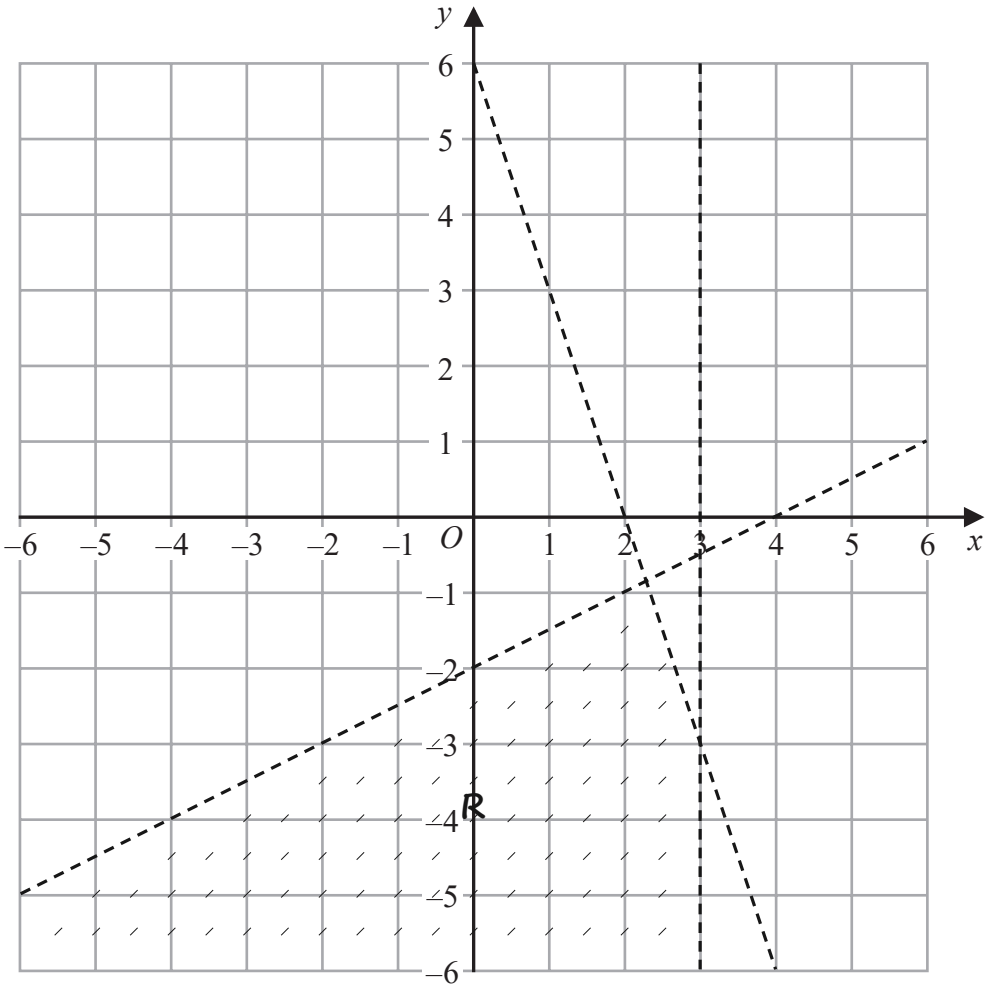

*Boundary lines: y = ½x – 2, x = 3, y = 6 – 3x.*

*Choose the side below both sloping lines and left of x = 3.*

**1 mark**
two correct boundary lines

**1 mark**
all three boundary lines

**1 mark**
correct region R

**(Total for Question 17 is 3 marks)**
