8 5 students throw a dice.
They each throw the dice the same number of times.

The diagram gives information about the number of times the dice lands on each number.

Work out how many times each student throws the dice.

Total throws: 6 + 4 + 5 + 8 + 7 + 5 = 35.

Five students threw equally: 35 ÷ 5 = 7 each.

3 marks total
Sum six frequencies
Divide by 5
7 throws

(Total for Question 8 is 3 marks)
