2 Natalie makes potato cakes in a restaurant.

She mixes potato, cheese and onion so that

weight of potato : weight of cheese : weight of onion = 9 : 2 : 1

Natalie needs to make 6000 g of potato cakes.

Cheese costs £2.25 for 175 g.

Work out the cost of the cheese needed to make 6000 g of potato cakes.

Total ratio parts = 9 + 2 + 1 = 12

Cheese mass = (2/12) × 6000 = 1000 g

Number of 175 g packs = 1000 / 175 = 5.714...

Cost = (1000 / 175) × £2.25 = £12.857...

Cost = £12.86

1 mark
