4 A water tank is empty.
Anil needs to fill the tank with 2400 litres of water.

Company **A** supplies water at a rate of 8 litres in 1 minute 40 seconds.
Company **B** supplies water at a rate of 2.2 gallons per minute.

1 gallon = 4.54 litres

Company **A** would take more time to fill the tank than Company **B** would take to fill the tank.

How much more time?
Give your answer in minutes correct to the nearest minute.

A: 1 min 40 s = 100 s; 8 L per 100 s

A: 2400/8 × 100/60 = 500 min

B: 2.2 × 4.54 = 9.988 L per min

B: 2400 / 9.988 = 240.288... min

Difference = 259.711... ≈ 260 min
